

4th April 2011

Dear Customer,

NOTIFICATION OF INDICATIVE ELECTRICITY DUoS CHARGES FROM 01.07.2011

On the 24th March 2011 Southern Power Distribution (SEPD) informed industry participants of its intention to revise its DUoS charges with effect from 1st July 2011 because of a significant error in the volumes used to derive charges and estimated revenues from reactive power. The error has a knock on effect into other DUoS charges.

Therefore please find attached copies of the relevant tables in the current IPNL charging statement which have been updated to be consistent with the change in SEPD charges that will apply from 1st July 2011. Please note all other charges in all other areas remain unchanged.

IPNL will produce a full charging scheme incorporating final prices when these are confirmed by SEPD.

If you have any queries please do not hesitate to contact me.

Yours sincerely,

Gareth J Jones
